

Biomedical Technologies and Innovation Doctoral Program (BIOTIN) announces 10 fully-funded PhD Fellowships under MSCA-COFUND Program

BIOTIN doctoral program features an international, interdisciplinary and intersectoral approach to provide 10 doctoral candidates (DCs) a unique blend of research training skills in the convergence of life sciences, engineering, and computational & data science, and entrepreneurship skills, with the aim of advancing innovation in biomedical research and education. BIOTIN consortium consists of Türkiye's top technology-focused universities (İzmir Institute of Technology and Boğaziçi University) alongside a clinical-research centre (İzmir Biomedicine and Genome Center) and 28 associated organizations including leading academic institutions and industrial partners worldwide. BIOTIN has been co-funded by the EU's Horizon Europe Marie Skłodowska-Curie Actions, the Scientific and Technological Research Council of Türkiye (TÜBİTAK) and İzmir Institute of Technology (IZTECH).

More information about the PhD projects, application criteria and how to apply, is available through BIOTIN's website <https://biotinhub.com> and the official announcement link.

You can also reach the latest news and announcements via BIOTIN Twitter and LinkedIn accounts.

Deadline for applications is March, 13 2023!
