

## SYLLABUS

### 1. Information regarding the programme

1.1 Higher education institution	<b>Babeş Bolyai University</b>
1.2 Faculty	<b>Faculty of Biology and Geology</b>
1.3 Department	<b>Department of Molecular Biology and Biotechnology</b>
1.4 Field of study	<b>Biology</b>
1.5 Study cycle	<b>Master</b>
1.6 Study programme / Qualification	<b>Bioinformatics applied in life sciences</b>

### 2. Information regarding the discipline

2.1 Name of the discipline (en) (ro)	<b>Databases for metacommunity ecology</b> <b>Baze de date pentru ecologia metacomunităților</b>		
2.2 Course coordinator	<b>CS II dr. Turtureanu Pavel Dan</b>		
2.3 Seminar coordinator	<b>CS II dr. Turtureanu Pavel Dan</b>		
2.4. Year of study	<b>1</b>	2.5 Semester	<b>2</b>
		2.6. Type of evaluation	<b>C</b>
		2.7 Type of discipline	<b>Elective</b>
2.8 Code of the discipline	<b>BME1126</b>		

### 3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	<b>4</b>	Of which: 3.2 course	<b>2</b>	3.3 seminar/laboratory	<b>2</b>
3.4 Total hours in the curriculum	<b>56</b>	Of which: 3.5 course	<b>28</b>	3.6 seminar/laboratory	<b>28</b>
Time allotment:					hours
Learning using manual, course support, bibliography, course notes					24
Additional documentation (in libraries, on electronic platforms, field documentation)					18
Preparation for seminars/labs, homework, papers, portfolios and essays					16
Tutorship					8
Evaluations					4
Other activities: .....					
3.7 Total individual study hours					70
3.8 Total hours per semester					126
3.9 Number of ECTS credits					5

### 4. Prerequisites (if necessary)

4.1. curriculum	<ul style="list-style-type: none"> <li>• Statistics</li> </ul>
4.2. competencies	<ul style="list-style-type: none"> <li>• Programming skills in R</li> </ul>

### 5. Conditions (if necessary)

5.1. for the course	<ul style="list-style-type: none"> <li>• Videoprojector</li> </ul>
5.2. for the seminar /lab activities	<ul style="list-style-type: none"> <li>• Computers, specific development environment</li> </ul>

### 6. Specific competencies acquired

<b>Professional competencies</b>	<p><b>C5.3</b> Integration of ecological information into accessible, digital systems</p> <p><b>C5.4</b> Quality evaluation of ecological databases in terms of structure, functionality and extensibility</p> <p><b>C5.5</b> The ability to restructure, extract and perform exploratory analyses on information derived from ecological databases</p>
<b>Transversal competencies</b>	<p><b>CT1.</b> Application of efficient work rules and responsible attitudes towards the scientific domain, for the creative exploitation of one's own potential according to the principles and rules of professional ethics</p> <p><b>CT2.</b> Efficient conduct of activities organized in an interdisciplinary group and development of empathic capacity of interpersonal communication, networking and collaboration with diverse groups</p> <p><b>CT3.</b> Use of efficient methods and techniques for learning, information, research and development of abilities for knowledge exploitation, for adapting to the needs of a dynamic society and for communication in a widely used foreign language.</p>

## 7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	<ul style="list-style-type: none"> <li>To learn concepts and specific techniques to create, manage and perform exploratory analyses on databases for meta-community ecology</li> </ul>
7.2 Specific objective of the discipline	<ul style="list-style-type: none"> <li>Students will learn various techniques to integrate, structure, store/manage databases for further analyses using specific software (particularly R)</li> </ul>

## 8. Content

8.1 Course	Teaching methods	Remarks
1. Introduction	<ul style="list-style-type: none"> <li>Interactive exposure</li> <li>Presentation</li> <li>Explanation</li> <li>Practical examples</li> <li>Case-study discussions</li> </ul>	
2. Sources of ecological data		
3. Data types used in meta-community ecology		
4. Formating and integrating ecological data		
5. Automatic data manipulation		
6-7. Numerical exploratory analysis		
8. Graphical exploratory analysis		
9. Vegetation databases		
10. Ecological databases		
11. Species distribution databases		
12. Ecological monitoring databases		
13-14. Students' presentations		
<b>Bibliography</b>		
<ol style="list-style-type: none"> <li>Spector, P. 2008. Data manipulation with R. Springer, Printforce, Netherlands.</li> <li>Logan, M. 2010. Biostatistical Design and Analysis Using R. Wiley-Blackwell, India.</li> <li>Wildi, O. 2017. Data analysis in vegetation ecology. CABI, UK.</li> <li>Chang, W. 2019. R Graphics Cookbook. Practical recipes for visualizing data. O'Reilly, USA.</li> </ol>		

Quinn, G.P., Keough, M.J., Experimental Design and Data Analysis for Biologists. Cambridge University Press, UK.

<b>8.2 Seminar / laboratory</b>	Teaching methods	Remarks
1. Preparation and integration of ecological databases	<ul style="list-style-type: none"> <li>• Interactive exposure</li> <li>• Explanation</li> <li>• Conversation</li> <li>• Didactical demonstration</li> </ul>	
2. R programming language for ecological databases		
3. Numerical and graphical exploratory analysis		
4-6. Investigating ecological databases		
7. Students' project presentations		
<b>Bibliography</b> <ol style="list-style-type: none"> <li>1. Spector, P. 2008. Data manipulation with R. Springer, Printforce, Netherlands.</li> <li>2. Logan, M. 2010. Biostatistical Design and Analysis Using R. Wiley-Blackwell, India.</li> <li>3. Wildi, O. 2017. Data analysis in vegetation ecology. CABI, UK.</li> <li>4. Chang, W. 2019. R Graphics Cookbook. Practical recipes for visualizing data. O'Reilly, USA.</li> </ol> <p>Quinn, G.P., Keough, M.J., Experimental Design and Data Analysis for Biologists. Cambridge University Press, UK.</p>		

**9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program**

<ul style="list-style-type: none"> <li>• The course is already included in the curriculum of many universities in the world.</li> <li>• The content of this course is considered important by all research entities, as well as those focused on nature conservation and the management of natural resources</li> </ul>
---

**10. Evaluation**

Type of activity	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share in the grade (%)
10.4 Course	Know concepts and methods from the domain of data mining and knowledge discovery	Research report and presentation	50%
10.5 Seminar/lab activities	Apply data mining techniques in real problems	Project implementation and presentation	50%
10.6 Minimum performance standards			
Each student should obtain minimum 5 for the research report and for the final grade. In order to obtain the minimum grade 5, the student must demonstrate knowledge of handling ecological databases for further analyses.			

Date  
16.01.2023

Signature of course coordinator      Signature of seminar coordinator  
CS II dr. Pavel Dan Turtureanu      CS II dr. Pavel Dan Turtureanu

Date of approval
